## Course content

The Auckland University Department of Paediatrics established this annual course in 1988. It is a two-week intense review of topics tailored for the Part 1 FRACP Paediatric examination. Over 60 practicing clinicians from Starship and other NZ hospitals present during the course, and speakers are carefully chosen to be up-to-date and informative. The course is updated every year and involves a mixture of topic reviews and mock questions within each session.

Most handouts, lecture recordings and a web-based programme of the topics are available to everyone attending the course in person or online.

The success of the programme has been testified by direct feedback and ultimate examination success from the course attendees. Please visit our teaching website to see testimonials.

To ensure maximal individual benefit and support, the places for the in-person option are limited in this course. The course is regularly oversubscribed and sold out. Early expressions of interest and early registration are recommended.

**If you are interested in this course and have had an unsuccessful exam result before, please contact the programme coordinator at: [fracpadmin@auckland.ac.nz](mailto:fracpadmin@auckland.ac.nz) for further discussion.**

**This teaching programme is organised by the Department of Paediatrics: Child and Youth Health, The University of Auckland with Starship Children's Hospital, Auckland, New Zealand.**

### What our past attendees say about the course

*"I was really impressed with the NZ course and I am glad I prioritised attending it. All the topics covered were very useful! In particular, there were questions on the exam that were directly covered by the course."*

*"The course was super exam focused with the integration of past questions and new content."*

*"Really well structured, engaging speakers, cohesive group approach that makes you feel less alone."*

*"I found both the weekly course and intensive fantastic. They complemented one another and were of good breadth and depth."*

*"I honestly felt like all my knowledge was consolidated during the course, and it was delivered really well! I've been recommending it to everyone."*
