What information is available in my script?

Grades in Inspera and Canvas may differ from your final grade as posted on SSO.

Your examiner will advise why provisional grades or marks on Canvas and Inspera may differ from your final grade for the course.

The first page of your script offers the following information:

1. **Status of the question**
   The status appears as either **Correct, Wrong, Partially correct**.

2. **Marks**
   The marks you achieved out of the possible marks. If there were questions within your exam that had multiple parts, you can only see the overall mark. For example, a File Upload question may have multiple parts, you only see the total marks.

3. **Question type**
   For example, multiple choice, essay, file upload

For multiple-choice questions, you can see which questions you got correct and what the correct answer was for any wrong answers.
